SAP Business One 9.3

Authorization Simplification

The image displays three SAP configuration screens illustrating the 'Authorization Simplification' feature. A navigation tree on the left shows the path: Setup > General > User Groups, with 'User Groups' highlighted. The main screen, 'User Groups', shows a form for creating or editing a group. The 'Name' field is set to 'Finance', 'Description' to 'Finance', and 'Group Type' to 'Authorization'. Below this, a table lists existing groups:

Group Name	Group Type	Users
1 Finance	Authorization	
2 Sales		
3 Purchase		
4 Inventory		

A dropdown menu for 'Group Type' is shown, listing: Authorization, Form Settings, UI Configuration Templates, and Cross All Types. The 'Active From' and 'To' dates are set to 01.11.17 and 30.11.17 respectively. The 'Cockpit Template' is set to 'Finance'. A 'Copy Form Settings' dialog is open, showing a table with 'Groups' tab selected:

#	Group Name	Description	
1	CRM		<input checked="" type="checkbox"/>
2	Sales	Sales	<input type="checkbox"/>

The dialog also has checkboxes for 'User Preferences', 'Message Preferences', and 'Tgoltip Preview Preferences', and 'Copy' and 'Cancel' buttons. A third screen, 'Users - Setup', shows user details for 'Kate Milton' with a 'Copy Form Settings' button at the bottom.

Feature

- Authorization Groups renamed to User Groups and relocated under Setup - General.
- 4 Group Types:
 - Authorization: User authorizations with validity dates; individual users within the User Group can have further refined validity dates.
 - Form Settings: User form settings.
 - UI Configuration Templates: Modified forms set as templates. **(PL01)**
 - Cross All Types: Applies to all types.
- Copy Form Settings now has a Groups tab; all users in the chosen group inherit the form settings.

Benefit

- Manage temporary authorizations.
- Quickly apply form setting defaults and/or templates (modified forms) to a group of users.

Feature

- The User – Setup form is enhanced to include various user-specific options, that previously used to be in the General Settings form.
- New icon on the toolbar enables users to access their user setup form and personalize it.
- The User Defaults form is extended and includes Display tab.

Benefit

- Better accuracy and clarity of company level settings vs. user-level settings.
- Enhanced usability – all users gain access rights to their own personal preferences (subject to authorizations).
- Better coverage of user defaults settings, enables more efficient implementation.

Change Logs Cleanup

Introduction
The change logs cleanup utility allows you to delete change logs of various documents and master data. Determine the range of change logs to be deleted by setting date into Logs Clean Up To.
Select the documents/master data to clean up their change logs. Executing the cleanup will delete change log entries which were created on a date which is equal or smaller than the selected date.

Warning: Deleting the change log data is irreversible

▼ Change Logs Cleanup	No Authorization	No Authorization
Execute Change Logs Cleanup	No Authorization	No Authorization

Feature

- New Change Log Cleanup Utility available.
- Enables users to clean out the change log to reduce the size of a company database.
- Users have the ability to determine which objects from the change log entries should be deleted and restrict the deletion to a specific date range.
- Utility subject to appropriate user authorisation.

Benefit

- Improve performance when running upgrades due to reducing amount of data to be upgraded.
- Companies running SAP Business One for a long time with a large change log are able to delete old changes that were registered.

OK Cancel

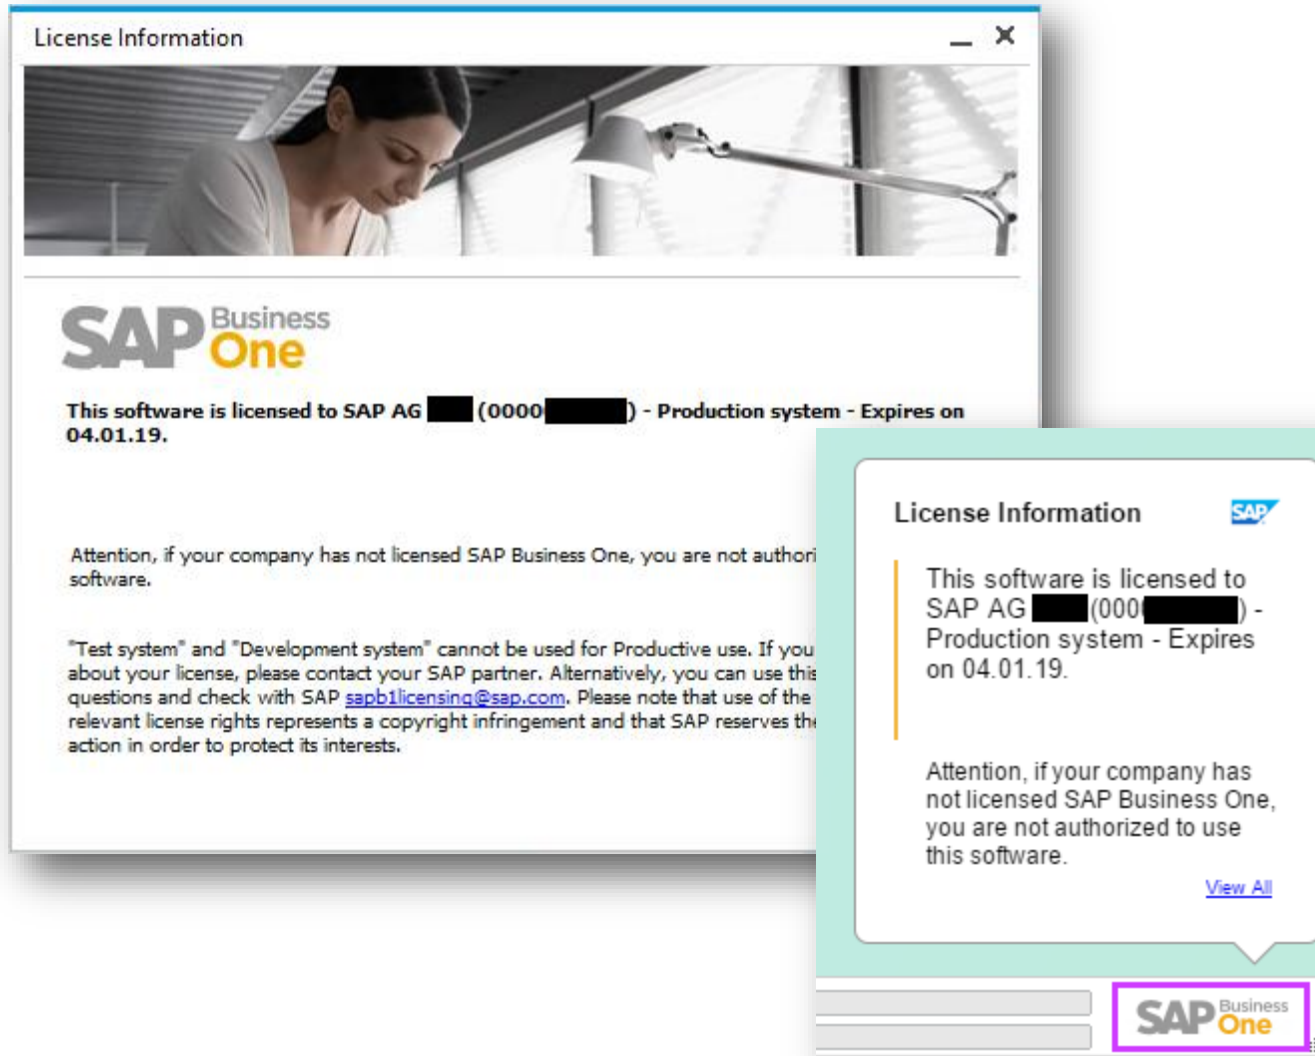

Feature

- Ability to copy data directly to target companies.
- Allows copying to a target company when connections exist to that company.

Benefit

- Saves time and effort without the need to copy data to a file first and then import the file into the target company database.
- Useful when copying data between test DBs and production company DBs.
- Users no longer need to be disconnected and interrupted during the data copying process.

License Updates

Feature

- As of release 9.3, a new license file will need to be generated and imported for every new minor (9.x) release.
- A watermark will be displayed on the bottom right of the SAP Business One desktop and the information sourced from the license file.
- The watermark will appear at each login and can be closed by the user by clicking on the SAP Business One icon.

Benefit

- Visibility for customers/end users to obtain relevant information about their licensed system.
- The new license file is more secure and protects the misuse of licenses.

No.: Primary 1306
Status: Open
Posting Date: 20.11.17
Due Date: 30.11.17
Document Date: 20.11.17

Feature

- New way to add dates in date fields
- To enter a new date in the date field you can use the following two methods:
 - 1- Use arrow keys
 - Up/Down arrows to increase/decrease respectively date in steps of 1 day
 - 2- Use operands
 - +/-N : add/subtract N days
 - +/-ND : add/subtract N days
 - +/-NM : add/subtract N months
 - +/-NY : add/subtract N years
- NOTE: You can only use D,M,Y (not case sensitive)
- NOTE: Do not leave a space between the operand, number and period

Benefit

- Quicker date input
- Ease of Use

Display Database Field Name for Import from Excel

Managing Multiple Open Windows

PL01

Feature

- In addition to close all windows, you have the option to leave the window that is currently being worked on
- Dependent forms will not be closed e.g. where a payment means form is open the underlying incoming payment screen will stay open
- Unique identifier (document number) helps user to choose the correct window to access

Benefit

- Increase efficiency
- Quickly get access to the relevant window where many similar ones are open

User Group selection in UI Configuration Template

PL01

The screenshot displays two overlapping windows from a SAP system. The background window is titled 'UI Configuration Template' and shows a list of templates on the left, with '1 New Sales Quote Templ' selected. To the right, fields for 'Name' (New Sales Quote Templ) and 'Description' (New Sales Quote Template) are visible. Below these is a table with three columns: 'Forms', 'Assigned Users', and 'Assigned Groups'. The 'Assigned Groups' column is highlighted with a red box. The foreground window is titled 'User Groups' and shows details for 'Template1'. It includes fields for 'Name' (Template1), 'Description' (Template for Remote Sales), 'Group Type' (UI Configuration Templates), and 'Active From' to 'To' dates. Below these fields is a table with two columns: 'Group Name' and 'Users'. The 'Group Name' column lists '1 Template1' and '2 Template2'. The 'Users' column is a table with columns: '#', 'User Code', 'User Name', 'Department', 'From', and 'To'. The 'Users' table contains two rows: '1 bill Bill Levine Sales' and '2 manager Jayson Butler General'. The 'Create Group' button at the bottom right of the 'User Groups' window is highlighted with a red box.

Forms	Assigned Users	Assigned Groups
1	<input checked="" type="checkbox"/>	Template1
2	<input type="checkbox"/>	Template2

Group Name	Users
1 Template1	1 bill Bill Levine Sales
2 Template2	2 manager Jayson Butler General

Feature

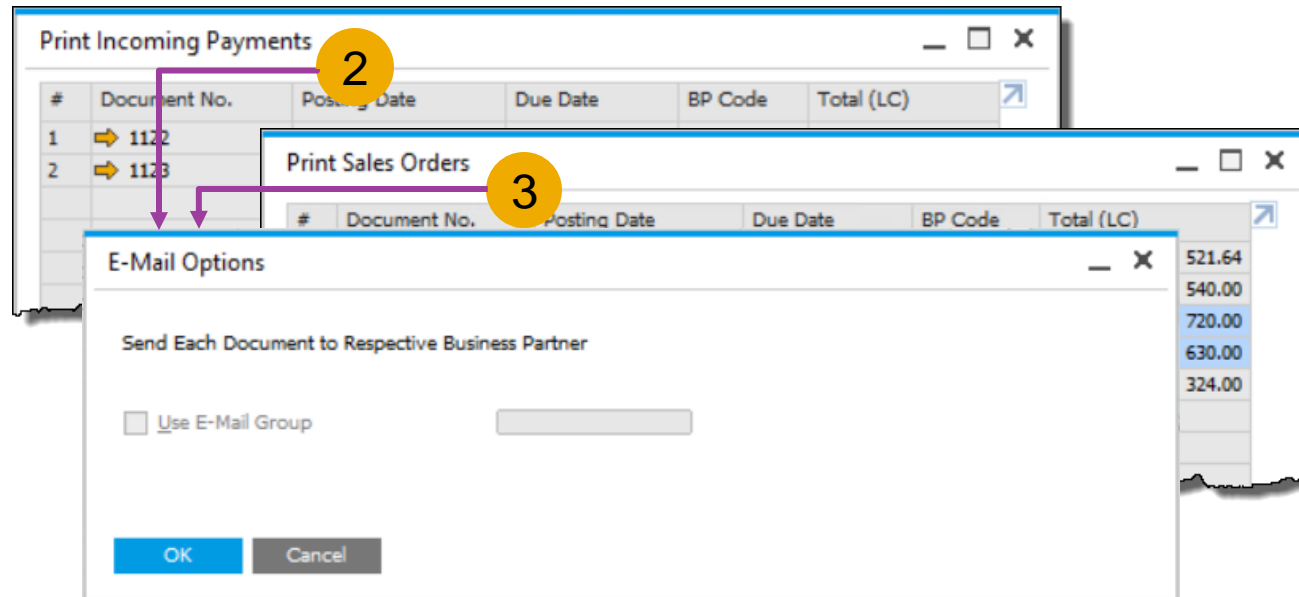

- You can now assign Groups to UI Templates.
- These Groups must first be created in User Groups using the Group Type UI Configuration Template.

Benefit

- Quickly apply UI Templates predefined groups of users.

Email Enhancements

PL05

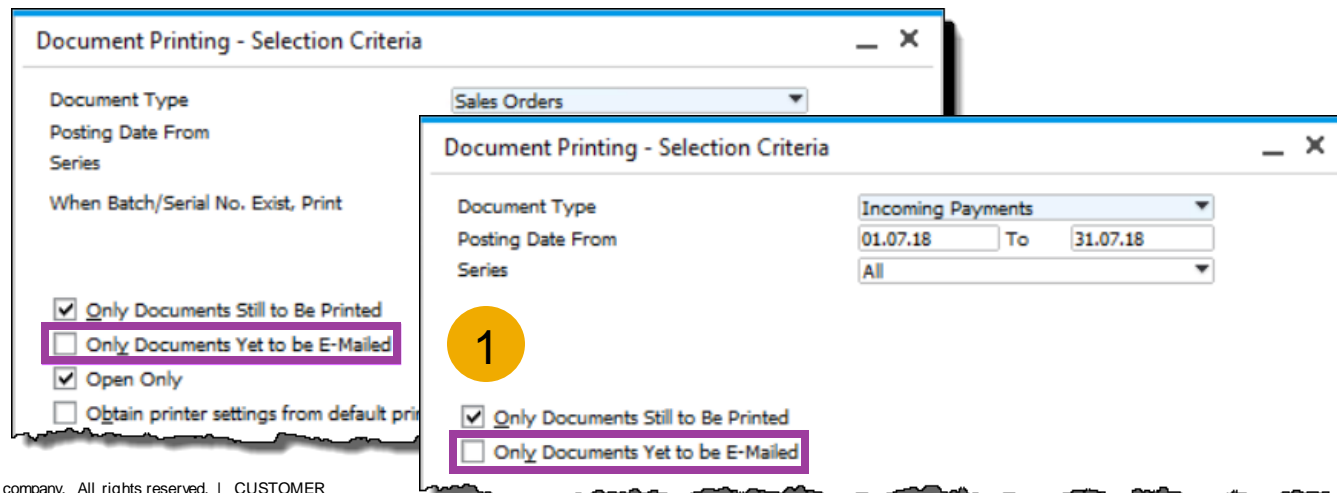

Feature

- Option 1: New option “Only Documents Yet to be E-Mailed” available in *Document Printing*
- Option 2: Window *E-Mail Options* appears for payment documents
- Option 3: Supporting Email function for multiple documents; window *E-Mail Options* appears

Benefit

- Better E-Mail handling

Administration

Feature	Description	Localization
Multi-Branch Supporting Data Ownership	When managing multiple branches the system can be set such that a user's access to BPs and Documents is possible only when the BPs'/Documents' branch assignment matches the user's branch assignment.	All
Multi-Branch Filtering and Transactions	Conversely, with the filtering functionality, in the choose from lists, the user is restricted to BPs and Documents having the same branch assignment. The user can, however, access all BPs/Documents by typing in the exact code/number. Additionally, reports can be filtered by branch selection.	All
HTML based Online Help	We now support HTML based Online Help files.	All
Browser Access Session Timeout	The session timeout setting is now adjustable when editing the browser access service in the system landscape directory.	All

Data Protection

SAP Business One 9.3

Personal Data Protection Management Initialization

PL04 GDPR (1/15)

The screenshot shows the 'Company Details' window with the 'Basic Initialization' tab selected. The 'Enable Personal Data Protection Management' checkbox is checked and highlighted with a red rectangle. Other visible settings include 'Chart of Accounts Template' (SKR03), 'Local Currency' (Euro), 'System Currency' (Euro), 'Default Account Currency' (All Currencies), 'Multi-Language Support' (checked), 'Use Perpetual Inventory' (checked), 'Item Groups Valuation Method' (Moving Average), 'Manage Item Cost per Warehouse' (checked), 'Use Purchase Accounts Posting System' (unchecked), 'Allow Stock Release Without Item Cost' (checked), 'Manage Serial and Batch Cost By' (Items Group Valuation Method), 'Enable Separate Net and Gross Price Mode' (unchecked), 'Default Bank Country' (Germany), 'Default Bank' (Deutsche Bank Privat und Geschäft), 'Default Account No.' (45679234709784567), 'Default Branch' (Berlin Filiale), 'Install Bank Statement Processing' (unchecked), 'Enable Intrastat' (unchecked), 'Enable Fixed Assets' (checked), 'Calculate Depreciation By' (Month), 'Enable Multiple Branches' (unchecked), 'Mask Credit Card Number' (checked), 'Enable Advanced G/L Account Determination' (unchecked), 'Allow Selection of Any Account Type for Revenue Accounts' (unchecked), and 'Enable Project Management' (unchecked).

Feature

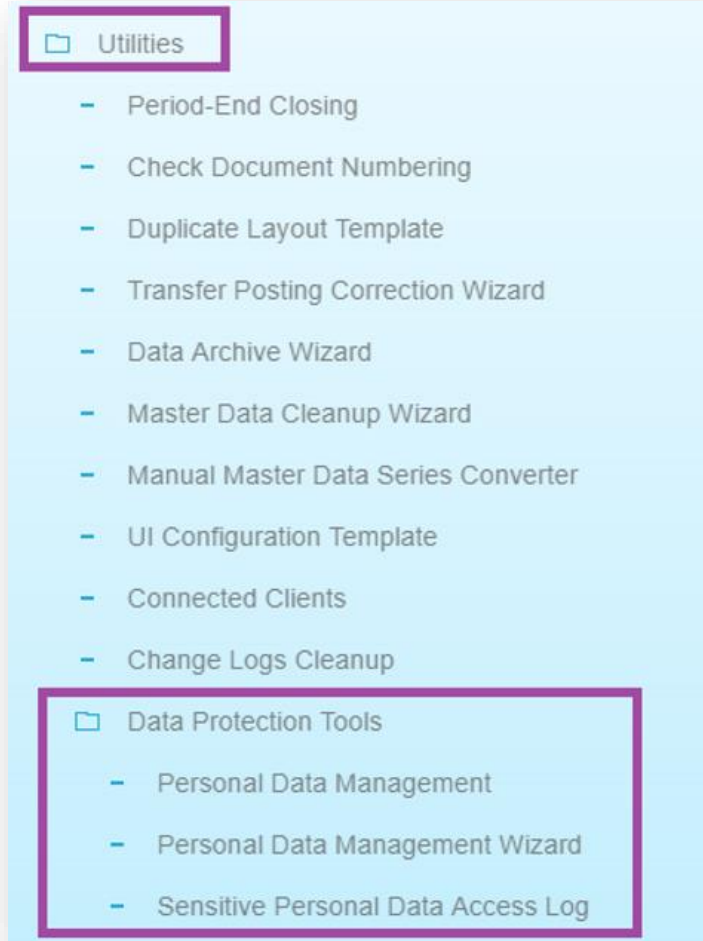

- Initialization setting on Company Details form to activate all new Data Privacy and Protection enhancements in SAP Business one.
- Automatically activated for all localizations for EU countries, Norway and Switzerland after upgrade to 9.3 PL04. It can be turned off (not recommended) before any natural person is determined and/or any personal data erasure or personal data block is executed.

Benefit

- Decide on activation of new functions to better control and contribute to GDPR and Data Privacy Protection compliance.

Data Protection Tools – Main Menu Entry

Feature

- Data Protection Tools are managed under Administration/Utilities.

Benefit

- Centralized location for managing personal data protection.

Feature

- New GDPR objects supported in the Change Log: Activities, Checks for Payments, Service Contracts.

Benefit

- Logging changes (date, time, owner) to personal data is a critical requirement of GDPR.
- Change log needs to be available everywhere personal data are stored and maintained.

Sensitive Personal Data – Access Log (Germany only)

PL04 GDPR (6/15)

The screenshot shows two SAP windows. The 'Employee Master Data' window on the left displays fields for personal data, including First Name (Bernhard), Middle Name, Surname (Heinrich), Job Title (Vertrieb), Position (Vertrieb), Department (Vertrieb), Branch (Haupt), Manager (Leitner, Robert), User Code (bernhard), Sales Employee (Bernhard Heinrich), and Cost Centre. The 'Sensitive Personal Data Access Log' window on the right shows a table of access logs for various users. The table has columns: User Code, User Name, Superuser, Locked, Canceled, and Latest Data Access. The user 'manager' is highlighted, showing an access log entry for '19.03.2018 00:15:30'. Below the table, there is a 'Personal Sensitive Data Access Log - manager' window showing a detailed view of the access log for the 'manager' user, with columns: Access Channel, Object Type, Key/..., Data Subject, Accessed Property, and Access Time. The 'Display Sensitive Data' button is highlighted in the bottom right corner of the 'Employee Master Data' window.

Feature

- Control by log/record of any access to a special category of personal data – sensitive personal data.
- In the core SAP Business One application it affects the Germany localization only.
- Values are encrypted in the database when fields are set as sensitive – this setting can be changed to personal or not personal.
- Values are hidden by default on User Interface – special authorization and control needed to unhide and display the value.

Benefit

- Selected authorized users can view hidden sensitive personal data values.

Feature

- New function under Personal Data Management Wizard which enables determining users, employees, business partners and contact persons as natural persons.

Benefit

- Helps to apply the natural person determination setting on a range of different data subjects.
- Natural Person setting is essential to use certain functions of Personal Data Tools for GDPR.

Personal Data Report (Driven by a person's request)

KEY SCENARIO / GDPR REQUIREMENT

- Natural persons are allowed to contact any organization to request details of which personal data the organization stores and processes about them.
- The organization needs to provide a report on this.

Feature

- New option to generate Personal Data Reports for selected natural persons.
- The report gathers personal data from master data and transactions.

Benefits

- Helps to follow up and execute natural person requests to retrieve any personal data which is held by the company.
- Helps the company verify personal data correctness following natural person feedback on personal data reports.

Feature

- New and very important Personal Data function under Personal Data Management Wizard to erase all personal data (by setup in Personal Data Management) of selected natural persons from master data and transactions
- Erased data on all affected master data and transactions will be replaced with asterisks
- Status of natural person whose personal data was erased will change to *Erased*
- This action is irreversible and must be taken after proper consideration and checking that all data retention periods are over and there is no legal obligation to hold the data of natural person

Benefit

- Helps to follow up and execute natural person requests to remove and erase personal data after legal periods to hold data have finished and there is no reason to block the data

Personal Data Blocking - Summary Report

#	Natural Person	Natural Person Code	Natural Person Name
1	Business Partner Master Data		
2		C80000	*

Feature

- Block access to personal data of natural persons
- Personal data cannot be accessed unless unblocked
- Once blocked these natural person records cannot be used in future marketing documents
- Natural person data undergone blocking has status Blocked
- Data blocking is reversible (see next slide) – different from Data Erasing

Benefit

- Personal data is required to be erased once retention of this data expires, however, blocking allows personal data retention for specific purposes and processes (legal regulations) e.g. extensions or overruling mandated by law
- Data encrypted and unavailable for future transactions

[illegible]

- Unblock access to personal data of natural persons that have been previously blocked
- Unblocked natural person data cannot be used in future transactions
- Unblocked natural person records can be blocked again or erased (by cleanup action)
- Natural person data undergone blocking and then unblocking has status Unblocked

- The reason for retaining expired personal data has arisen (e.g. legal reporting to an external authority) - unblocking personal data facilitates access to this data
- Unblocking decrypts personal data and is visible by users authorised for forms where this data is stored

Sensitive Personal Data – Bank Accounts of Natural Persons

GDPR (14/15)

PL06

Feature

- Control by log/record of any access to a special category of personal data – sensitive personal data – now includes bank account data
- In the core SAP Business One application the following three fields are affected:
 - Business Partner Bank Account No.
 - Business Partner IBAN No.
 - Employee Bank Account

- Bank Account values in master data and transactions (payments, check register, bill of exchange, OPEX table, deposits, etc.) encrypted in the database
- Values hidden/masked by default on User Interface – *NOTE: manual change required when upgrading from 9.3 PL04 or 9.3 PL05*
- Access and decryption via DI API supported

Benefit

- Selected authorized users can view hidden sensitive personal data values

Bank Accounts and IBAN Encryption and Impact on Payment Wizard

PL06

Important Rules

- When updating OPEX table with the payment run data, the **bank account no. and IBAN** of business partner who is determined as natural, are taken into the OPEX as **encrypted data**.
- When generating the bank file in payment wizard, the encrypted data is decrypted before taken into the bank file.
- The decryption of this data when the bank file is of type EFM format, is supported only when the selected payment methods in the payment wizard run are all related to EFM format. When the wizard run involves payment methods which relate to both EFM and DLL formats and the wizard includes business partners which are determined as natural persons, the bank account and IBAN will not be decrypted before taken into the EFM bank file. A pop-up message is raised to warn users about the combination of two different bank file categories.
- The decryption of the data when the bank file is of type .DLL format is handled by DI service (SAP Note [2633811](#)). This service is called by the payment add-on. The payment add-on identifies the fields to be decrypted by the setup in Personal Data Management.
- Once the bank file is generated with decrypted data, users need to ensure it is stored in a secure and protected location.

Feature

- Create a Return Request (A/R) or Goods Return Request (A/P).
- This pre-step for the return document includes the agreed quantities, prices, return reason and return action before the goods are actually returned.
- You can manage serials and batches in both Return Request (PL01) and Goods Return Request.
- Request transaction creates an allocation on the item master record.

Benefit

- Enables management and tracking of the return process.
- Increased transparency.

Special Prices for Business Partners

BP Code: C20000 BP Name: Maxi-Teq BP Type: Customer Price Mode: Net
 Price List: Regular Sales Price
 Discount Percentage: 0.00
 Find:

#	Item No.	Item Description	Price List	Primary Curre...	Discount %	Source Price	Price after Discount	A.
1	C00001	Motherboard P4 Turb	Regular Sales Price	GBP 300.00	10.00	Price - Pri.	GBP 270.00	✓
2			Regular Sales Price		0.00	Price - Pri.		✓

Active From 01.05.17 To 31.05.17

OK Cancel Add Items Copy Discounts

Feature

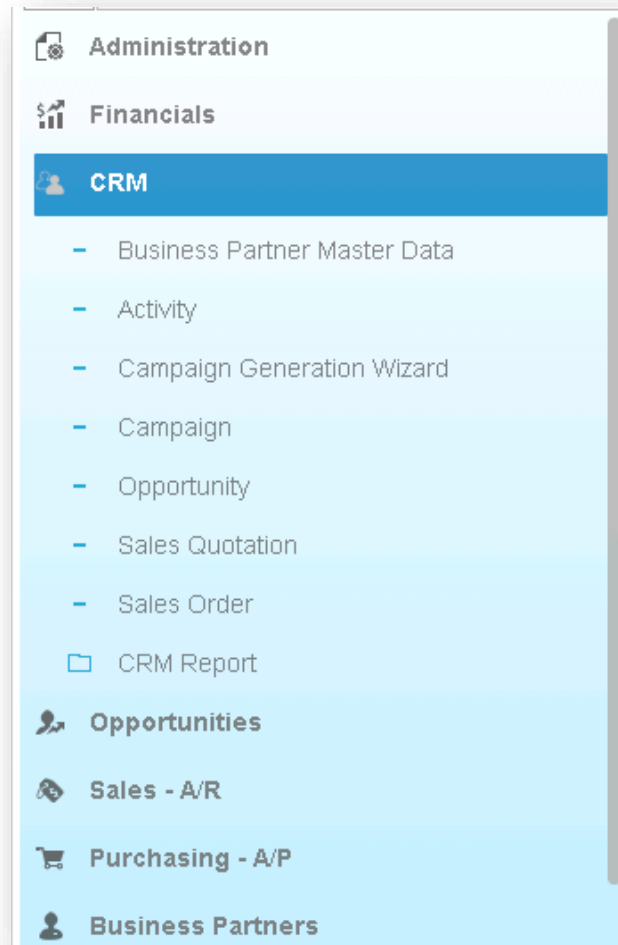

- Effective Price setting:
 - Forces lowest/highest price applicable
 - Applies existing logic for calculating effective prices and chooses the appropriate one based on the choice above
 - Review the decision process in [Online Help](#)
- Special prices can be limited by an active period.

Benefit

- More flexible pricing functionality by BP.
- Minimize incorrect discounting and maximizing revenue.
- Increase productivity and simplify customization.

Centralized CRM Module

Feature

- New module “CRM” is added under the financials module, listing all the functions related to CRM.

Benefit

- Centralized CRM module enhances usability and increases productivity.

CRM Enhancements

The screenshot displays three overlapping windows from a CRM system:

- Activity Window:** Shows fields for Activity (Phone Call), Type (Project meeting), Subject (NSI-C20000), Assigned To (Recipient List), Assigned By (Jayson Butler), and various codes/numbers.
- Recipient List - Management Team Window:** A table listing recipients for the activity.
- Activities Overview Window:** A table showing a list of activities with columns for Number, Start Date, Start Time, Handled By, Activity, Recurrence, BP Name, Contact Person, and Status.

#	User Name	Department	Branch	Recipient Type
1	keith	Logistic	Main	User
2	mary	Logistic	Main	User
3	Kora	General	Main	User
4	manager	General	Main	User

Number	Start Date	Start Time	Handled By	Activity	Recurrence	BP Name	Contact Person	Status
1	18.07.16	12:42	Jayson Butler	Meeting	None	Maxi-Teq	Norm Thomp	
3	17.05.17	17:29	Management Team	Phone Ci	None			
4	17.05.17	17:34	Multiple	Phone Ci	None			
5	17.05.17	17:34	Jayson Butler	Phone Ci	None			

Feature

- Activity can be assigned to multiple users/employees; respective recipient lists can be created and maintained for this purpose.
- Activities Overview indicates handlers, be it single or multiple.

Benefit

- Increases efficiency - no need to create an activity for each user.

Document Types

Document Type

☐ Sales Opportunities
☐ Sales Quotations
☒ Sales Orders
☐ Deliveries
☒ A/R Invoices
☐ Without Linked Document

Feature

- Manage authorisations for generating and executing campaigns.
- Load saved campaigns, executed or non-executed.
- Find function added to the following forms:
 - Target Group Details
 - Target BPs in Manual Campaign
 - Target BPs in Campaign Generation Wizard
- Campaign List – Selection Criteria expanded to enable filtering by linked Documents.
- Sales Amount and Gross Profit reflected in Campaign List.

Benefit

- Users can differentiate between executed and non-executed campaigns.
- Improved usability and analysis of campaign successes and failures.
- More easily search for details within a target BP list.
- Greater control over campaign execution.

Blanket Agreements (1/2)

Sales Blanket Agreement

BP Code: C50000
BP Name: ADA Technologies
Contact Person: Mary Brown
Customer Ref. No.:
BP Currency: EUR
Telephone No.: +49 949 32728389
E-Mail: mary.brown@ada-tech.co

No.: Primary 4
Agreement Method: Items Method
Start Date: 08.06.17
End Date:
Exchange Rate: 1.2000
BP Project: PR1
Termination Date:
Signing Date: 08.06.17

Description:
☐ Set as Default

General Details Documents Attachments Recurring Transactions

Agreement Type: General
☒ Ignore Prices Specified in Blanket Agreement
Payment Terms: 2P10Net30
Payment Method: Incoming BT
Shipping Type: Fedex EM
Settlement Probability %: 0.00
Remarks:

Status: On Hold
Owner:
☐ Renewal
Reminder: Day(s)

General Details Documents Attachments Recurring Transactions						
#	Group	Planned Quantity	Unit Price	Cumulative Committed Quantity	Cumulative Committed Amount...	Cumu...
1	Printers	100	EUR 100.00	10	GBP 2,500.00	50
2						

Feature

- Determine exchange rate in blanket agreement when BP currency is foreign currency and blanket agreement is managed on the document header.
- Add committed/ordered qty/amount to *Detail*stab.
- Determine shipment type within the blanket agreement.
- Payment Method and Payment Terms in the blanket agreement can be determined when the blanket agreement is not managed on the document header.
- When no document is linked to the blanket agreement, you are able to update the Start Date.
- Manage customer/vendor reference no. in blanket agreement.
- Display document status in Documents tab.
- Manage project code in blanket agreement.

Benefit

- Exchange rates can be an agreed blanket agreement term.
- Increases flexibility and productivity - user can update the blanket agreement terms instead of creating new one.
- Easily track committed/ordered qty/amount in blanket agreement which is not delivered yet.

Blanket Agreements (2/2)

The screenshot shows the 'Document Settings' dialog box with the 'Blanket Agreements' tab selected. The following options are visible:

- ☒ Block Multiple Blanket Agreements for Same A/P Document
- ☒ Block Multiple Blanket Agreements for Same A/R Document
- When No Default Blanket Agreement is Available, and Only One Valid Blanket Agreement Exists
 - ☐ Automatically Assign the Blanket Agreement to A/P Document
 - ☐ Automatically Assign the Blanket Agreement to A/R Document
- When Quantity/Amount Exceeds Planned Quantity/Amount for Documents
 - Purchase Orders: Without Warning
 - Goods Receipts POs: Without Warning
 - Accounting: Without Warning
- ☐ Enable Negative Payment for Payment
- ☐ Enable Multiple Scheduling for Scheduling

Buttons: OK, Cancel

Feature

- Enable updating planned amount, planned quantity, and price in blanket agreement that is linked to other documents.
- Control the deviation from blanket agreement planned amount or planned quantity.
- Option to automatically assign a valid Blanket Agreement where no default Blanket Agreement is chosen from many and only one is valid.

Benefit

- Better control over the purchasing process by blocking deviations from blanket agreements.

The screenshot shows the 'General Settings' dialog box with the 'Blanket Agreements' tab selected. The following options are visible:

- ☒ Allow Multiple Blanket Agreements for Same Period
- ☒ Enable Updating Unit Price/Planned Quantity/Planned Amount in Blanket Agreement with Linked Documents

Buttons: OK, Cancel

Items - UDF1 dropdown menu:

- All
- Empty
- Filled
- Enter Value

Feature

- Up to 5 user defined fields can be managed in the determination criteria screen.
- You can use these 5 UDFs in defining the rules in the Advanced G/L Account Determination Rules screen.
- Options available:
 - All – criteria not relevant
 - Empty – field must be empty
 - Filled – field must have a value
 - Enter Value – field has a specific value

Benefit

- More flexibility in determining account to be posted to based on business criteria.

Integrated Payment Engine

The screenshot shows two overlapping windows from the SAP system. The background window is the 'Payment Wizard' with the title 'Payment Run Summary and Printing'. It contains a summary of the payment run (0 orders, 1 payments, 0 checks, 1 bank transfers added) and a list of documents to print (Outgoing Payments, Incoming Payments, Non-Included Transactions, Country Summary, Currency Summary, BP Summary, Payment Method Summary, Bank Account Summary, Payment Summary). A 'Print' button is at the bottom right. The foreground window is the 'Payment Engine' window. It has a 'Select Path' field set to 'C:\temp', radio buttons for 'Test Run' and 'Production Run' (selected), and tabs for 'Protocol', 'Preview', and 'Payment File'. The 'Protocol' tab is active, showing a log of the production run: 'Start Payment Engine', 'Handling outgoing payment...', 'Check payment for bank Barclays', '1 records were found in payment results table (OPEX)', 'No EFM format defined for this payment method: Incoming BT', 'Handling outgoing payment...', and 'Production Run finished successfully.'. At the bottom of the 'Payment Engine' window are 'Create Files', 'Cancel', and 'OK' buttons. Below the 'Payment Engine' window, a 'Step 8 of 8' bar is visible with buttons for 'Bank File', 'Cancel', '< Back', and 'Finish'.

Feature

- Integrated bank file created when Electronic File Manager (EFM) designed outbound bank file formats are linked to the payment method selected in the Payment Wizard.
- Note: Historical .dll bank file formats not designed with the EFM add-on still require the Payment Engine Add-on.

Benefit

- Smoother and faster execution of payments and creation of bank files sent to house bank and/or customer bank.
- Payment wizard is more intuitive.
- No need to install the separate add-on, less time consuming and ready to use after installation.

Scheduled Batch Processing

☐ View Executed Payment Runs

#	Payment Run Name	Date	Total	No. of Payments	Status
1	Wiz20170608n1	08.06.17	23,955.76	0	Scheduled

Feature

- Leverage the service layer for parallel processing on the server-side.
- Tasks are dispatched and scheduled in the Job Server.
- Payment Wizard transactions will initially be supported.
- New *Execute Payment Run on Server* option in the Payment Wizard with ability to schedule a specific date and time.

Benefit

- Handle heavy transactions with parallel processing.
- Allows users to close the payment wizard form or even the SAP Business One client as the task is running on the server side.
- Reduces the load on the client side by scheduling a future date and time for processing on the server.
- Faster processing time for large transactions.

Feature

- Export SAP Business One form data into various file formats using XML. See [SAP Note](#).
- Create Crystal reports out of the XML and assign required fields inside EFM mapping file.
- Assign EFM GEP files as electronic file for any report.

Benefit

- Flexible generation of output files.
- One click user experience with generation of electronic reports with simple print preview.

Allow any Business Partner in A/R Invoice and Payment document header

Welcome, Jayson Butler. You are in cockpit of [OEC Computers UK](#).

Feature

- In the A/R Invoice and Payment screen you are now able to input any Business Partner (BP). The default BP can be removed.
- You can now activate the payment means screen directly from posted A/R and A/P Invoices.

Benefit

- Enhanced usability
 - Faster invoice and payment input for all BPs
 - Faster access to payment screen

Enable Down Payments from Orders using Payment Means

The screenshot shows the SAP Sales Order interface. The 'Sales Order' tab is selected. The 'Payment Means' dialog box is open, showing the following details:

- Customer:** C20000
- Name:** Maxi-Tea
- No.:** Primary
- Status:** Open
- Currency:** GBP
- G/L Account:** 160000
- Primary Form Item:** Payments for Invoices from Customers
- Overall Amount:** GBP 5,915.70
- Balance Due:** GBP 5,915.70
- Discount %:** 0.00

The 'Down Payment Request' button is highlighted in the bottom right corner of the dialog box.

Feature

- Create a Down Payment Invoice or Down Payment Request from a Sales or Purchase Order
- Follow up Down Payment transaction added together with the above

Benefit

- Efficient entry of related transactions

Financial Management

Feature	Description	Localization
IFRS Revenue Recognition Enhancements	In addition to Blanket Agreement (BA) enhancements, following features also help fulfil the new IFRS 15 Standard: Revenue from contracts with customers: <ul style="list-style-type: none">- Currency handling on BA- Approval procedures for BA	All
Manage Change Log for Block Negative Inventory By	Support viewing history of changes made to the setting: Block Negative Inventory By. The fields BlockZero and NegStoLv in table CINP are moved to table OADM.	All

Feature

- The context menu links to:
 - Project Overview form detailing the entire project and it's hierarchical structure in one table.
 - Time Sheet Report.
- Create stage dependencies across different project levels including subprojects.
- New column under Stages tab - *Finished Date* allows users to define an actual finish date of each stage which can be compared to the planned end date.
- A *Stage ID* field has been created to better link projects to marketing documents and employee time sheets.
- A new Time Sheet Report clearly displays the link between a project and time worked on the project by employee.
- Under Documents and Work Orders section, a new *Chargeable* tick box field indicates if a connected document line is chargeable to a customer.
- Additional project related information is added to the Activity form and users can also set an activity relevant for project billing.

Posting Date: From To

Delivery Date: From To

Step 1 of 3

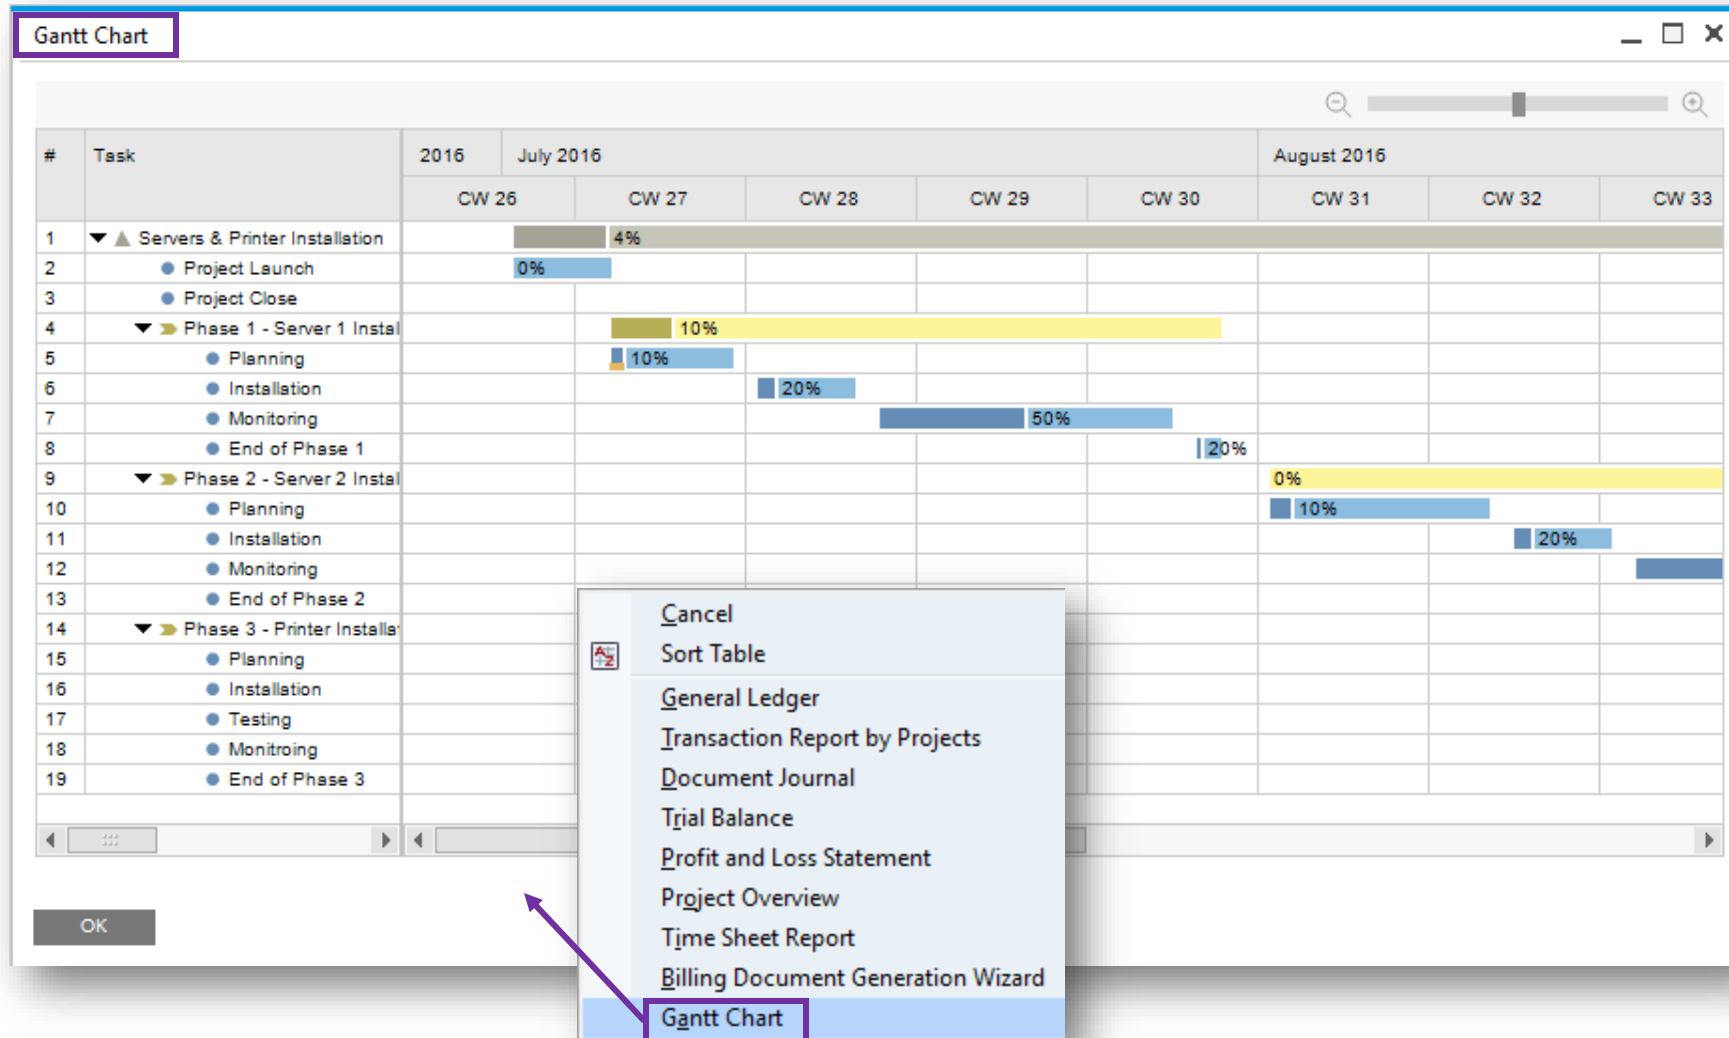

Feature

- New Billing Document Generation Wizard allows users to recharge costs or bill a project.
- The billing wizard collects open document lines and billable items connected to the project for invoicing.
- Creates AR Delivery or AR Invoice documents based on the project data stored in the Project Management form.

Benefit

- Users have a holistic overview of projects and detailed information related to each project.
- Increases productivity and transparency.
- The billing wizard streamlines the standard billing or milestone billing process and helps improve efficiency.

Project Management (3/3)

Feature

- Access a Gantt Chart via context menu in Project window.
- The Gantt Chart visualizes the project as a whole.

Benefit

- More transparency, increased productivity, and enhanced usability.

Feature

- Supports Single Run Capacity which is the available daily capacity of a single resource unit, assuming a Production Order can only be produced on one resource unit at a time.
- Ability to calculate Single Run Capacity by including and/or excluding Daily Capacity Factors.
- Ability to set daily capacity basis using 'Set Internal Capacity to Single Run Capacity' which will allocate a default budgeted capacity of hours per day.
- Resource Capacity window will highlight the maximum daily single run capacity available.

Benefit

- Ability to differentiate between Daily Capacity and Single Run Capacity by including and/or excluding Daily Capacity Factors.
- Supports production orders that are only able to be produced on a single machine.
- Reflects the number of capacity resources a production order can consume on each working day.

☒ Open Quantity of Components
☐ Quantity of Parent Items 1.000 ☒ Include Additional Quantity

Feature

- New routing function facilitates production processing through a defined sequence of production stages.
- A new *Routing Stage – Setup* window allows you to define Route Stages.
- Multiple routing stages are added into Production Order structures.
- Allows you to define the route sequence of any combination of Production Order line types.
- New *Priority* field allows you to manually enter a priority of the Production Order. The lower the number, the more important the Production Order.
- An ability to control stage start and end dates with a new *Routing Date Calculation* field to choose *On Start Date*, *On End Date*, *Start Date Forwards* or *End Date Backwards*. This can automatically calculate date dependences between route stages in the Production Order.
- The *Issue Components* window allows you to filter which manual Production Order component lines will be passed into the drawn document.

Feature

- Bill of Materials form has been redesigned to improve usability and support routing stages and sequencing.
- Multiple routing stages are added into Bill of Material structures.
- Allows you to define a route sequence of any combination of BOM line types.
- Change the order of and entire stage as a group.
- Add UDF's to the new row Type - Route Stage
- New columns on Bill of Materials Report – Route Sequence, Route Stage and Route Stage Description showing related stage information valid at the time of transaction.

Feature

- The Pick & Pack Manager has been renamed to Pick Pack and Production Manager.
- New fields to the Open, Released and Picked Drawers make it usable as a simple Production Manager console, such as Route Stage, Route Sequence, Product No. and Production Priority.
- Filter your selection criteria by a number of Production Order attributes such as Start Date, Route Stage, Route Sequence and Production Priority.

Benefit

- Ability to plan, execute and manage basic route based production.
- A significant enhancement for all businesses with a light production requirement.
- Enables greater control over production-related item and resource component management.
- Provides an estimated understanding of when component demand may be required.

- On the Summary tab, the *Total Run Time* field is renamed to *Total Production Time*.
- Production Time*, *Additional Time* and *Run Time* on the Route Stage line are estimated according to the Resource with the longest Run Time of all Resource lines belonging to the stage.
- The Resource that takes most of the time determines the route stage duration.
- New selection criteria options added to the right-click operations of Production Order:
 - Transfer Request
 - Component Transfer
 - Generate Pick List

9	Item				0	0		Planned	

Remarks

Update

System Message

Reduce "Planned Qty" to match "Issued Qty"?

☐ Remember My Answer and Do Not Show This Message Again

Yes No

Feature

- A new *Status* column is added to *Production Order* to set a line status for *Route Stage*, *Item* or *Resource* to *Planned*, *In Process* or *Complete*.
- The *Status* field is editable on all lines. The status of all component lines will be updated according to the status on the *Route Stage* line.
- When the line *Status* is changed to *Complete*, a check is performed across all line items and a system message appears asking the user to *Reduce Planned Qty* to match *Issued Qty*. The answer will be valid for all components.
- When a *Route Stage* is set to *Complete* it will not contribute any data to the algorithm which calculates the Routed Production Order Start Date Forwards/End Date Backwards behaviour

☒ Update Rows

Feature

- New Management Task – *Change BOM Header*
- New section *Specify Properties of BOM Header to be Changed* is added with the following options:
 - Change Quantity
 - Change Warehouse
 - Change Price List
 - Change Distr. Rule
 - Change Project
 - Change Planned Average Production size
- New *Update Rows* checkbox allows users to change and review the rows before execution.
- New *Change Header Preview* window allows users to review the BOM header properties to be changed before execution.

☐ Change Issue Method

☐ Change WIP Account

☒ Change Route Sequence

☒ Change Route Stage

☒ Change Price List

☒ Change Distr. Rule

☒ Change Project

OK Cancel

Feature

- New section *Routed* shall be added to include filtering for:
 - Route Sequence (From - To)
 - Route Stage (From - To)
- Route Stage is a new option under Select BOM Lines giving you the ability to:
 - Delete route stage rows together with all components belonging to this route stage
 - Change Route Stage Code and Waiting Days for existing Route Stage.
- *Add BOM Lines* and *Change BOM Lines* management tasks now have the option to set and/or change *Price List*, *Distr. Rule* and *Project* details.
- *Change Route Sequence* and *Change Route Stage* are also new options when Routed is set to *Yes* and *Item*, *Resource* or *Text* is selected.

Benefit

- BOM Component Management now supports route stages.
- Increased flexibility when specifying properties for BOM lines to be changed for items and resources.

						GBP 0.00

Feature

- A new *Variance Report* is added for Production Orders. To open this report, go to Production Order -> Summary tab and click the yellow arrow next to the Total Variance Field.

Benefit

- The report shows the contribution of each production component to the final production variance for a selected Production Order.

Pick and Pack Selection Criteria Enhancement

Feature

- Selection Criteria field added
 - Save multiple selection criteria
 - Duplicate/Remove templates
 - Update/Rename templates
- Additional filter “Issue Method” for production orders

Benefit

- Centrally set up default Selection Criteria
- Quickly select required selection criteria
- Target production orders that have a specific issue method

Display Available Batches

Feature

- View batch quantities in terms of the document UoM from which the Batch assignment/allocation screen is triggered.

Benefit

- Less confusion: batch selection corresponds to quantity in the document and not the Inventory (storage) UoM.
- Increase warehousing efficiency.

Global setting to control “Display Batch Quantities By”

PL01

Feature

- Global setting to drive best practice as maintained in the organization.
- Batch Unit of Measure (UoM) corresponds to Global setting.

Benefit

- Uniform usage throughout the organization.
- Increases efficiency.

The image shows two screenshots of SAP software. The top screenshot is the 'General Settings' dialog box, specifically the 'Inventory' tab. It shows the 'Display Batch Quantities By' setting set to 'Document Row UoM'. The bottom screenshot is the 'Batch Number Selection' dialog box, showing a table of batches with quantities. The 'Quantity' column is highlighted, and the value '4' is shown. The 'Batch' column shows 'B1-00067' with a quantity of '8.333'. The 'Batch' column is highlighted, and the value '8.333' is shown. The 'Batch' column is highlighted, and the value '8.333' is shown. The 'Batch' column is highlighted, and the value '8.333' is shown.

Annual Sales Analysis (by Quarter)		Crystal	2017-07-14 1...	Success	Document Ty...		Download Delete

Feature

- Favorite Reports tab appears when a minimum of one report is marked as a favorite.
- Documents can be downloaded directly, or scheduled (daily, weekly, monthly) and sent via mail.
- Report runs (scheduled or manual) are saved in the Report History area:
 - Information like report name, type, start date time, run status etc. are listed.
 - The report result can be downloaded and viewed.
 - The maximum number of report results for each report scheduling task can be configured.

Benefit

- Provides an overview of scheduled reports and historical data.
- Documents can be scheduled and are available on different devices.

SAP HANA

New Cockpit Templates 1/2

The screenshot displays the SAP Cockpit interface. At the top, a welcome message reads: "Welcome, Jayson Butler. You are in cockpit of QEC Computers UK." Below this, a "Sales Process" flowchart is visible, showing steps like Sales Quotation, Sales Order, Delivery, Return, A/R DP Invoice, A/R Invoice, A/R Credit Memo, Incoming Payments, Dunning Wizard, Customer, and Sales Reports. A "Select Templates" dialog box is open on the right, listing various templates with checkboxes and their visibility status.

Select Templates	
<input type="checkbox"/> Finance	Public
<input checked="" type="checkbox"/> Sales	Public
<input type="checkbox"/> Purchase	Public
<input type="checkbox"/> Inventory	Public
<input type="checkbox"/> My Sales Cockpit	Public
<input type="checkbox"/> Start Cockpit	Private

At the bottom left, another screenshot shows a "by Sales Amount" chart with a context menu open, highlighting "Update My Cockpit" and "Save As Template" options.

Feature

- New Cockpit Templates available for Finance, Sales, Purchase and Inventory
- Users can create own Cockpit Templates and set them as Public
- Selection of available Cockpit Templates via "Select Templates" button
- Choose the template which should be shown

Benefit

- Possibility to create different views
- More flexibility
- Create different Cockpit views for different roles or for test purposes

Publish

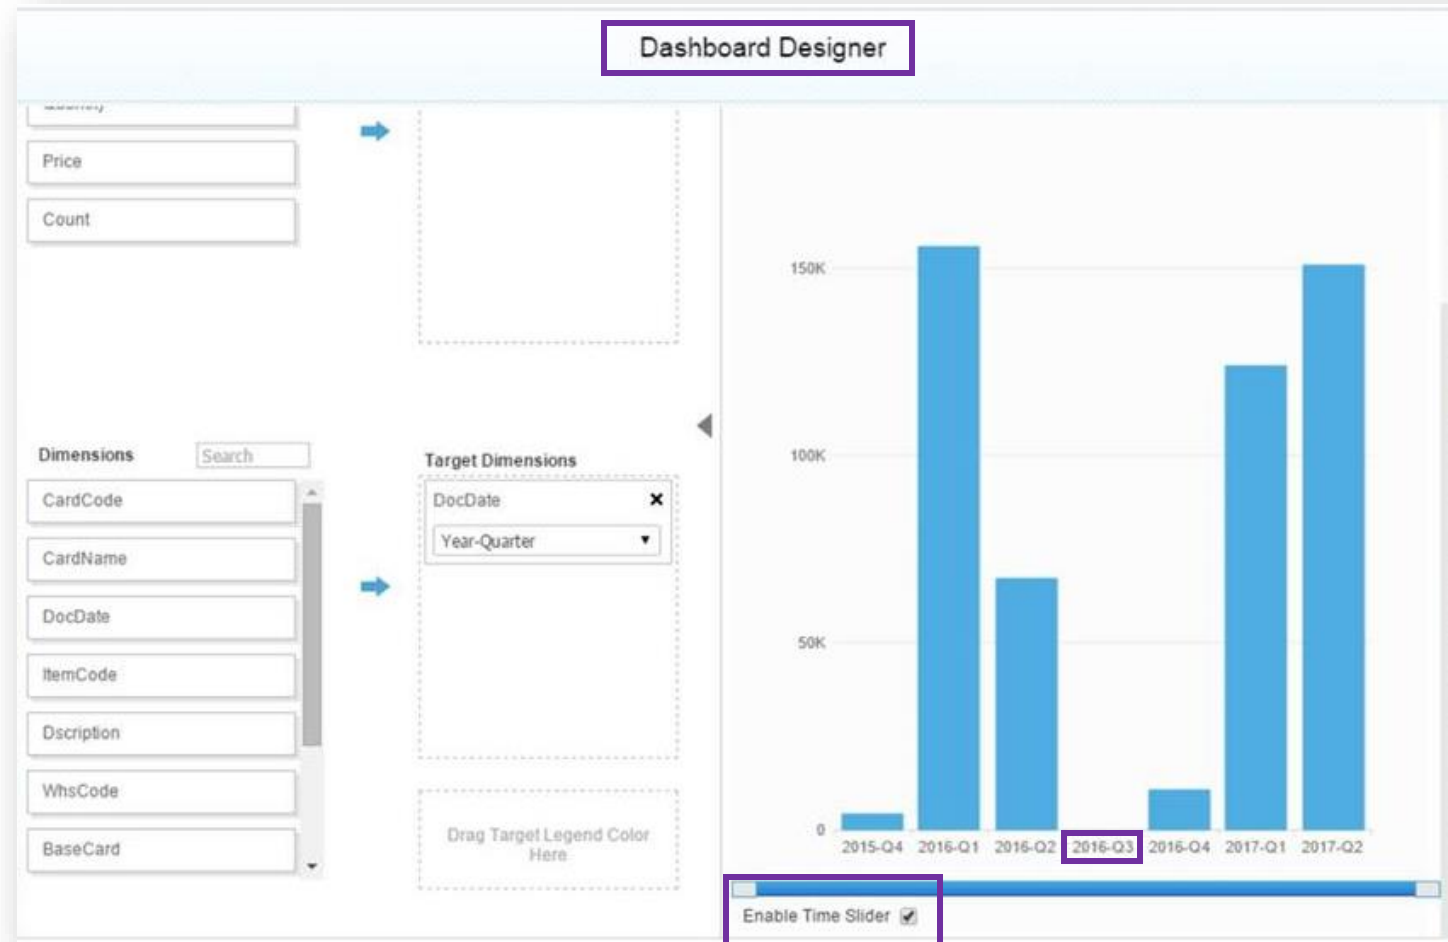

Feature

- Newly created Cockpit Templates can be published to all users
- To do this special authorization is necessary
- Cockpit template can be assigned by a power user to special user groups
- For each system authorization group a default Cockpit Template is available
- Only one template can be assigned to one default authorization group

Benefit

- Possibility to create different Cockpit views
- Central template management and assignment

Pervasive Analytics Dashboard Designer

Feature

- User can enable the Time Slider function.
- After enabling Time Slider, empty data records are shown in the Dashboard.
- Empty data records are shown as zero.

Benefit

- All units of time (day, month, week, year etc.) are shown in the Dashboard.
- Provides an overview of the whole time frame including records shown as zero with no interruption.

- ☐ Enable Document Operations by Mouse Only (Such as Add, Update, OK)

Enable Company Specific Mailer Configuration

- ☒ Enable Company Specific Mailer Configuration
- SMTP Server mail.oec.co.uk
- SMTP Port 25
- Authentication Plain Password
- User Name mail@oec.co.uk
- Password *****
- Encoding English (UK)
- ☐ Use TLS Encryption
- ☐ HTML Direction Right to Left
- ☐ Include Subject in Message Body

Update Cancel

Feature

- Enable company specific mailer configuration.
- Switch between global company mailer configuration and company specific configuration.

Benefit

- Each tenant can have their own mail server in SAP Business One Cloud.

Query Manager UI Enhancements

The screenshot shows the 'Query Manager' window. At the top, there's a title bar with standard window controls. Below it, a 'Query Name' search bar contains the text 'credit'. Underneath, a 'Query Category' dropdown menu is set to 'System'. To the right of this dropdown is a 'Manage Categories' button. A tree view on the left shows expanded folders: 'System' (containing 'Credit Limit Deviation' and 'Customers Credit Limit Deviation'), 'General', and 'Item Master'. At the bottom, there are buttons for 'OK', 'Cancel', 'Schedule', 'Create Report', 'New Stored Procedure', and 'Remove'. A double-headed arrow points to the 'Remove' button.

Feature

- Filter the list of queries by query name.
- Expand the form to fit the results on your screen.

Benefit

- Fast access to queries.
- Full view of long query names and folders.

Using Extension Package Tool in Command Line Mode

```
Command Prompt

C:\Program Files (x86)\sap\SAP Business One SDK\Tools\ExtensionPackage>ExtensionPackage.exe /v:"1.3" /86:"C:\Users\I043582\Desktop\AddOn Source\DemoAddOn\bin\x86\Release\DemoAddOn.exe" /64:"C:\Users\I043582\Desktop\AddOn Source\DemoAddOn\bin\x64\Release\DemoAddOn.exe" /p:"C:\Users\I043582\Desktop\AddOn Deployment Package\DemoAddOn.zip" /s:"C:\Users\I043582\Desktop\AddOn Deployment Package\DemoAddOn.ard" /ex:".dll|.pdb|.manifest|.b1s"

C:\Program Files (x86)\sap\SAP Business One SDK\Tools\ExtensionPackage>

Info:C:\Users\I043582\Desktop\AddOn Deployment Package\DemoAddOn.zip already exists.The original file will be replaced.
Start packaging.
Packaged successfully.

C:\Program Files (x86)\sap\SAP Business One SDK\Tools\ExtensionPackage>.
```

Feature

- Generate lightweight extension package from command line

Benefit

- Automatization for solution packaging

ExtensionPackage.exe

/v: "1.3" (version of the Add-On solution)

/86: "..\DemoAddOn\bin\x86\Release\DemoAddOn.exe" (path to add-on 32 bit executable file)

/64: "..\DemoAddOn\bin\x64\Release\DemoAddOn.exe" (path to add-on 64 bit executable file)

/p: "C:\temp\Deployment Package\DemoAddOn.zip" (full path to save the output package)

/s: "..\AddOn Deployment Package\DemoAddOn.ard" (source ARD file which contains basic information)

/ex: ".dll | .pdb | .manifest | .b1s" (exclude files with specified suffixes under the packaging directory)

Feature

- ## Benefit

- Semantic view service supports OData ver. 4
- The following query options are available :
\$filter, \$select, \$orderby, \$top, \$skip and \$count.
- Parameters can be used.

Platform | Extensibility

Feature	Description
EFM Enhancement	Porting from C# to JAVA to support electronic invoices in service layer (Portugal only). 
SAP Business One Studio	SAP Business One Studio supports Visual Studio 2015 and TFS (Team Foundation Server) 2015.
X-App Supports SSO for Service Layer	X-Apps can make calls to Service Layer without requiring the end user login again. 
UI-API Lost Focus-Get Focus Improvements	Improved performance of grids when updating calculation fields
Support XML methods for SAPbouiCOM.DBDataSource	Fast data retrieve and manipulation on DBDataSource.
Service Layer as a Service*	A new service on the Service Layer platform which exposes semantic layer views in OData format. * Planned for later patch level in SAP Business One 9.3, version for SAP HANA 
Optimized Login Connection	Connect method optimization
Internal Reconciliation is exposed in DI API and Service Layer	The feature is presented as a new CompanyService object. Generally, it can get, cancel and add reconciliation entries.
Manage Electronic Document Monitor from DI API	The feature is presented as a new CompanyService object. It can get, add, delete and update the Electronical Documents. It has a feature to manipulate with the Electronical Documents logs.
User Defined Field extension	The User Defined Field's Link to System Object section had been extended with 20 additional objects, like Bill of Materials, Opportunity, Activities, Banks and Users.

Feature

- Register MS Windows and SUSE Linux machines of a company
- Remotely install and use the SLD agent for various operations, such as:
 - Creating Server Repository (SBO-COMMON)
 - Installing SAP Business One Client remotely
 - Adding Demo Databases
 - Upgrading SAP Business One Database

Benefit

- Comprehensive and direct management of the company landscape at hand
- Save time in implementation tasks

Embedded Incident Management

PL03 Update

Recorded Steps

This file contains all the steps and information that was recorded to help you describe the recorded steps to others. Before sharing this file, you should verify the following:

- The steps below accurately describe the recording.
- There is no information below or on any screenshots that you do not want others to see.

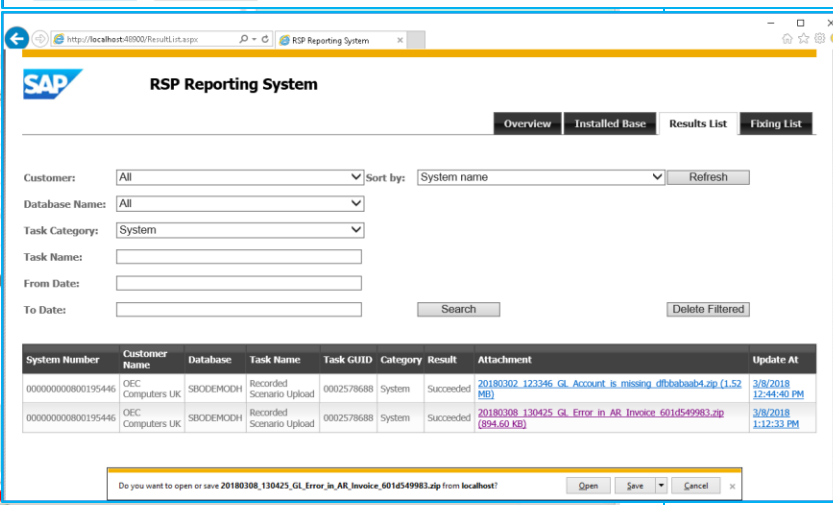

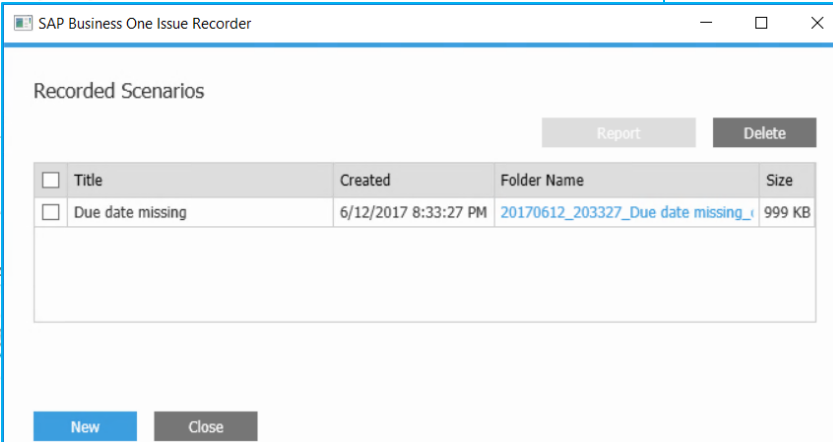

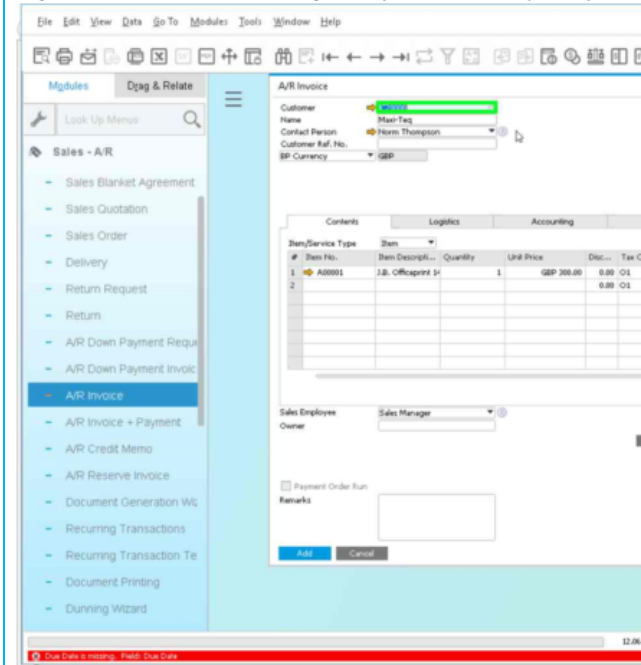

Passwords or any other text you typed were not recorded, except for function and shortcut keys that you used.

You can do the following:

- Review the recorded steps
- Review the recorded steps as a slide show
- Review the additional details

Steps

Step 1: (6/12/2017 8:37:15 PM) User keyboard input on "A/R Invoice (window)" in "S"

Feature

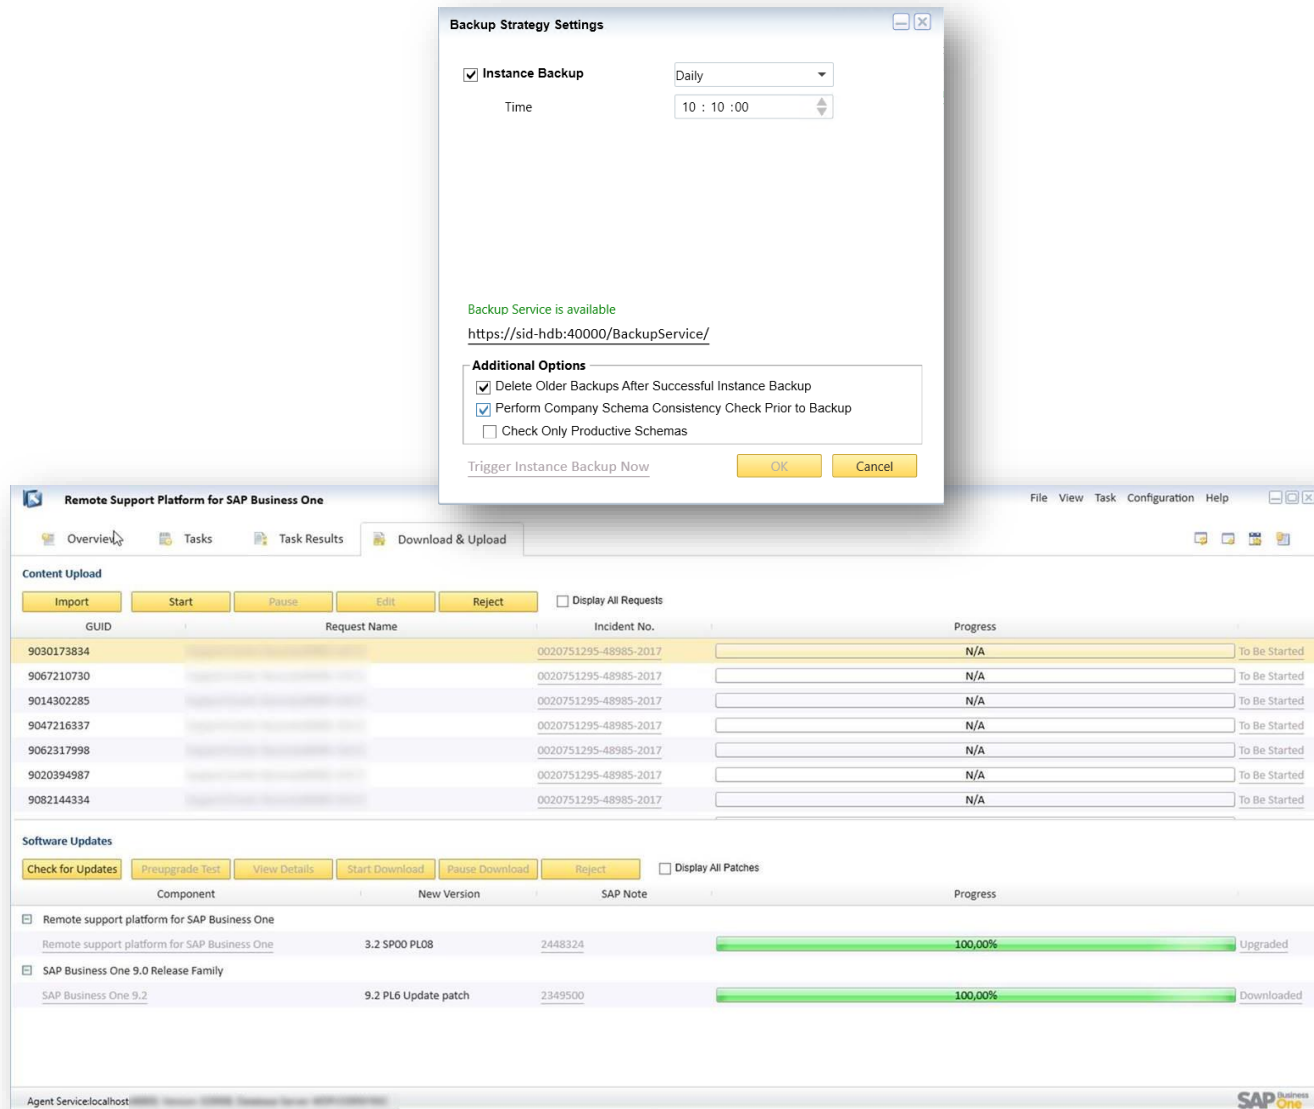

- Instantly record a problem inside SAP Business One Client
- Document all taken steps as screenshots with text
- Submit report including issue description and file path to Partner WebDAV by the Remote Support Platform Task 2578688 (PL03)

Benefit

- Provides accurate issue description to SAP Partner
- Reports problems internally to get direct support from colleagues within the company

Remote Support Platform 3.2

Latest Features

- Schema Consistency Check enforcement to Instance Backup feature
 - RSP Task 2315090 performs SAP HANA schema consistency checks described in SAP Note [2116157](#)
 - Ability to run on productive databases only
 - Ability to get email notification about status change
- Simplified Content Upload Requests (CUR) for upload of GoToAssist recordings
 - No need to email the Content Upload request and encryption key.

Benefits

- Consistency check strategy
- Quicker and more effective support

Note: As of SAP Business One 9.3, RSP's versioning is de-coupled from SAP Business One's versioning. RSP 3.2 patches will be delivered together with SAP Business One 9.3, thus allowing a flexible software delivery of RSP.

Thank you.
