B1 Usability Package

Get more value with your SAP Business One

Rather than relying on expensive development work, B1UP lets you customize SAP Business One to suit your needs, and in turn cut this portion of your working day to a fraction of the size that it is now, saving you and your colleagues time and your company money.

With the B1UP, you can maximize the daily use of your SAP Business One by customizing it by e.g. changing the layout of every window in SAP Business One, hide unused fields, create shortcuts, create mandatory fields and much more. With the B1UP, you can have a SAP Business One who works for you and are tailored to your specific needs, instead of having fields you do not need etc. interrupting your daily work routine.

Furthermore, you now have the possibility to integrate useful functions such as recurring invoicing and letter merge into your SAP Business One, without having your SAP partner develop a costly solution.

B1UP includes	
Function Buttons	X
Mandatory Fields	X
Item Placement Tool	X
Add & Edit Menus	X

SAP Certified
SAP Business One Integration

Quick and Easy Customization

(Make SAP Business One suit your customer)

Function buttons (available through right click)

Applies buttons on every window, which enables you to make shortcuts, automate business processes and ease the navigation through SAP Business One.

Mandatory fields (available through right click)

Make every field in SAP Business One mandatory, enhancing the data quality and ensuring no data is forgotten.

Item Placement Tool (available through right click)

Screen designer functionality where you can redesign every form in SAP Business One. Relocate and hide fields & tabs, enabling that SAP Business One can be customized to suit the individual customers business and processes.

Add & Edit Menus

Create your own menus or rename the existing ones. Make the menu suit your customer.

Tab Control

Define a new tab order in your SAP Business One. Making the entering of data in SAP Business One faster.

Default Data

Set additional default data for business partner and Items, hereby enhancing the user friendliness of SAP Business One.

Toolbox

A range of functionalities which enhances the general usability in SAP Business One. E.g. <Enter> in a document will send the cursor to last empty row and not add the document.

Template system

Create snapshots of current data for any window and store them as templates for easy creation of master data and execution of reports. Often used to create and manage different customer and item groups.

Quick Create

Enables you to create a new item or business partner on the fly in a simple form, making the user able to focus on the business here and now and not on SAP Business One.

Make Items Read Only

This new module allows you to define items that are read only for any window in SAP Business One.

Enhancement Modules

(Enhance the use of SAP Business One)

B1 Search

Search functionality which allows you to search up to 14 different forms and on row levels on documents, enabling the customer to find the relevant information fast and efficiently.

Recurring invoices

Enables the SAP Business One to handle invoices which need to be send recurrently. E.g. Rent, maintenance, subscriptions. Giving a solid overview of expected income and already invoiced amounts.

PLD Extension

Import and Export reports layouts to XML.

Letter Merge

Merge data from Business Partner Master Data with you own Microsoft Word (2003&2007) templates. Single or mass letter merge. CRM is enhanced through the possibility to add activities connected to the merge.

Exchange rates

Online update of exchange rates via the ECB (European Central Bank).

Account Balance

Create account balance reports for customers/suppliers in PDF.

On Site development

(Made for consultants)

B1 Validation system

Defines triggers, can control different conditions and launch universal functions. The systems allows consultant to perform minor developing tasks directly on site.

Universal Functions

A range of functions which can enhance the use of SAP Business One. Common is that these functions needs a trigger, either B1 Validation system or universal functions.

Master Data Manager

With this tool you are able to perform administration and maintenance tasks on common master data in the current database. This is done without the need for external tools like Data Transfer Workbench.

Example of B1UP use

The screenshot shows the SAP Business One Sales Order window. Annotations point to various B1UP features: 'B1 Validation System' points to the 'Status' field; 'Toolbox Flags' points to a flag icon; 'Toolbox Line Search' points to the search bar above the item table; 'Function Buttons' points to the 'Top 10 Items', 'Special Prices', 'Reconciliation', 'Ageing', 'Shipping Payments', 'My Report 1', 'My Report 2', and 'Activity' buttons on the right. The 'Item Placement Tool' points to the 'Item' column in the table. The table contains 5 items: IBM Infoprint S312, IBM Infoprint S222, IBM Infoprint S226, HP Color Laser Jet 5, and HP Color Laser Jet 4. The total amount is 14,300.00 \$.

About Boyum IT A/S

Boyum IT was established in 1997 and is today one of Denmark's leading SAP Business One development and consultant houses. Since the beginning our philosophy has been to offer professional users a great and safe IT solution with high reliability and security. Boyum IT A/S has been a SAP Partner since 2004, and the company is today a certified Gold Partner, as one of the few in Scandinavia.
