# Get to know Logres

**Since 1993, we have been providing wholesalers and companies in process industries with ERP software that truly enhances their business operations. We do this with a down-to-earth approach, genuine commitment and a clear focus on results.**

If you are considering switching to new ERP software, Logres will help you gain the maximum benefit from it. We aim to be a true partner: approachable, engaged, proactive and knowledgeable.

Together, we strive for the best results by combining your business knowledge with our ERP expertise. Your company always comes first.

Implementing new business software is a major – and often exciting – step for any organisation. We understand this better than anyone. That's why we guide you from start to finish, using a practical approach and clear agreements.

In this brochure, you'll find more information about our company, our software packages and our working methods.

**“We combine your knowledge of your business with our expertise in ERP.”**

# Our ERP packages

Logres offers two powerful ERP solutions: **SAP Business One** and **Klipboard Wholesale**. Both are designed for SMEs looking to streamline their processes and create room for growth.

Our packages are particularly suited to wholesalers, both nationally and internationally. In addition, SAP Business One is tailored to meet

the specific needs of manufacturers in process industries.

Both solutions have proven themselves many times over and are renowned for their user-friendliness and reliability.

## Business One

### SAP Business One

Is your business growing? SAP Business One grows with you. Worldwide, SAP is the largest provider of ERP systems. SAP Business One has been specifically designed for SMEs, offering flexibility, scalability and versatility.

Logres has been a SAP Business One Premier Partner for many years, receiving multiple SAP Awards for innovation and guiding the largest number of successful implementations in the Netherlands.

## Wholesale<sup>®</sup>

### Klipboard Wholesale

The Wholesale ERP package is of Dutch origin and was developed in collaboration with wholesalers. It was formerly known as Unit4 Multivers Wholesale.

Logres is one of the leading implementation partners and having installed this package at hundreds of companies. As a result, we know exactly how to automate your product data efficiently and effectively.

# Important functionalities for your company

## Financial

Manage quotes, customer orders, invoices, accounts receivable and current accounts for multiple customers. Scan and link invoices automatically and automate your year-end closing.

## Sales

Transform your ERP system into a powerful sales tool. Give your sales team direct access to customer information, manage customer-specific pricing and expand your reach to include international customers.

## Purchasing

Manage all your transactions in one place. With Material Requirements Planning (MRP), you can automate purchasing based on real-time inventory data.

## Inventory & Logistics

Scan incoming and outgoing products and ingredients to see where goods are and what their status is in real time. Reduce errors and accelerate your logistics processes.

## Production

Monitor production status in real time and receive assistance with scheduling. Ensure full traceability of your products, from supplier to end customer.

## Service and Maintenance

Store and manage customer communications, complaints and repairs. Communicate directly from your system with technicians and customers and take immediate action when issues arise.

## Reports and Dashboards

Empower your employees to make faster, smarter and well-informed decisions by capturing all critical information and providing it in real time.

## Add-ons to your ERP package

In addition to our ERP packages, we offer complementary solutions that integrate seamlessly. These include invoice processing, BI tools, AI functionalities, WMS and PIM solutions – allowing you to expand your ERP with the features your company truly needs.

The best part? Often, you can't even tell where the ERP ends and the extension begins. Everything works as a single, unified system – just as it should. Although there are hundreds of add-ons available,

not every solution is suitable for every company. Logres knows the market and provides independent advice. We are not tied to a single partner and always focus on what works best for your organisation and daily operations.

# Our working method

At Logres, we believe it is essential that you always know what to expect. An ERP implementation is often large and complex but we provide structure and clear guidance throughout the process.

Over the past decades, we have developed a tried-and-tested method that consistently delivers results. We take a step-by-step approach, breaking the overall task into manageable phases. This enables you to control the impact on your team and avoid any surprises.

Our approach is strategic: first, we thoroughly map out your processes and requirements, and only then do we begin implementation. This ensures that we arrive at a solution that is truly tailored to your company.

# Our Seven-Step Approach

## 1 Introduction

Successful collaborations start with a strong connection. We like to get to know you and your company – to understand your challenges and identify the opportunities.

## 2 Demo

See how the selected ERP system can work in practice for your organisation.

## 3 Investment Proposal

What will the implementation cost you, both in time and money? Gain insight into the possibilities and decide whether they align with your needs.

## 4 Business Blueprint

This is where we turn the plan into reality. Together, we define how your processes will be structured and which functionalities are required.

## 5 Implementation and training

We configure the system and ensure your team is fully trained to start using it immediately.

## 6 Go-Live

The moment your ERP system becomes fully operational. Our consultants are on-site to ensure a smooth and seamless transition.

## 7 Support and Optimisation

Even after go-live, Logres remains involved. Our support desk is easily accessible and we actively advise on opportunities for further optimisation.

### What's next?

At Logres, we see an ERP implementation not as the endpoint, but as the starting point. Once the system is up and running, we make sure everything runs smoothly while also looking ahead.

Together, we explore how new functionalities, smarter processes and further automation can help your business progress.

This way, your ERP system continues to grow alongside your ambitions.

# Why Logres?

An ERP implementation is like laying a solid foundation for your business. When the foundation is strong, you can build on it for years to come. Logres helps you lay that foundation – with software that fits your needs, industry expertise and a methodology tailored to the realities of SMEs.

For over 30 years, we have worked with wholesalers and companies in process industries. This experience allows us to quickly understand your processes and anticipate the challenges you face.

**“Our consultants speak your language and bring expertise gained from hundreds of successful implementations.”**

We don't partner with every organisation. Sometimes, we realise that a company doesn't align with our focus and we are upfront about that. When we do decide to work together, it's because we are confident that we are the right fit for you.

Our approach is pragmatic and results-oriented. We work diligently to ensure the successful implementation of your project, moving at your organisation's pace and following a timeline that suits your business. If things change along the way, that's no problem – we simply adapt and keep moving forward.

What sets us apart most is that our involvement doesn't end when your implementation goes live. We remain available, answer your calls and actively advise on further development and optimisation. This way, your ERP grows with your ambitions, enabling you to continue building confidently for the future.

# The next move is yours.

In this brochure, you've been able to read who we are and what we do. Do you think Logres is a good fit for your company? Let's get to know each other in a no-obligation meeting.
