## Multi-faceted Label Printing Management

**Manage all your printing templates and label printers from one location and make sure your products are labelled exactly the way you want them to be.**

- A single tool to manage all the printing templates and label printers throughout your organization
- Label inventory comprehensively and precisely to your own specifications
- Manage large numbers of printers simultaneously
- Print from multiple SAP Business One company databases
- Support for SAP Crystal Reports and native printer languages such as ZPL and Bixolon
- Transfer configurations from one company database to another effortlessly

**Key benefits:**
- Designed to support production and logistics processes
- Guaranteed enterprise-wide data consistency
- Track inventory quickly and effortlessly
- Faster, more efficient transactions

**Fully integrated with:**
- SAP Business One
- CompuTec ProcessForce
- CompuTec WMS
- CompuTec PDC
- Or any combination of the above
- Custom integrations with other SAP Business One solutions upon request

## LOADED WITH MANAGEMENT TOOLS

### Printing rules management

- Decide who can print what and from which printers
- Define which transactions will prompt printing
- Print multiple labels after single transactions
- Assign templates according to user, department, warehouse or any other factor
- Designate label layouts on a printer by printer basis according to printer parameters for e.g. label size to make sure your labels are clear and well-presented

**Review label parameters** and print sample labels to make sure you have got it just right before starting a print run of thousands of inaccurate labels.

**Automatically generate PDF records** of each label based on SAP Crystal Reports.

**Email reporting** triggered by print runs or the creation of certain documents.

**Full transaction and printing history** available to ensure transparency and to aid troubleshooting.

### SUPREME FLEXIBILITY

- Complete control over how you design of your labels in external software or the labels definition to meet your needs, your customers' demands and regulatory standards
- Simple, easy to understand custom fields mapping tools so you can configure your labels quickly and easily
- Set-up your system to handle a multitude of special printing rules according to your needs even on a user-by-user basis
- Copying configurations and data from label to label is a straightforward process

### BEYOND STANDARD PRINTING CAPABILITIES

- Print directly from SAP Business One forms which are not normally accessible to printers e.g. Item Master Data, Bin Location Master Data and User Defined Objects
- Trigger printing by the creation or updating of particular documents or any other SAP Business One transaction you can imagine
- Record Manufacturing Order times
